SAYS BIG COMPANY IS ILLEGAL TRUST

Special Commissioner Brace, of Missouri, Says That International Harvester Co. of New Jersey, Should be Dispossessed—Merely Selling Agent in Evasion of Missouri Laws.

Jefferson City, Mo., Sept 7.—Special Commissioner Theodore Brance, in his report to the Supreme court, held today, declares that the International Harvester Co. of New Jersey is an illegal trust and a combination for and with the effect of destroying competition in the manufacturing of and the sale of tractors and farm implements, so that the prayer for its ouster or dispossessing should be granted.

The International Harvester Co. of America is declared to be used merely as a selling agent by the New Jersey Co. in evasion of Missouri laws which prohibit the licensing of the Jersey concern or its employees under the state's 1910 act.

The subversive corporations, according to Commissioner Brace, now

have no capital. Its existence as a separate corporate entity is a mere fiction to evade the laws of the state, whose policy is, not to encourage such a combination of wealth and power in the hands of a few as may injure the many.

The commissioner found that the International Harvester Co., the International Harvester Machine Co., Warde, Bushnell & Co. and Plant Manufacturing Co. were all owned by the same

Harvesting Machine Co., were in active competition prior to 1902.

In June, 1902 Cyrus McCormick & J. P. Morgan, of New York, were in革新 competitive conditions

Winnipeg, Sept. 6.—Harry E. Brittain, the man who organized the Imperial Press Conference, returned to Winnipeg yesterday after a nonstop flight from British Columbia, where he has been on a trip with Premier McBride.

Mr. McBride, apparently, got the information from the big country and the man. He said he was not acquainted with all the big men of Canada, but this was one of the first of greater possibilities than that of the Pacific coast, and he was mighty glad to learn that he had made a good impression.

Asked about the Imperial Press Conference, Mr. McBride said it had undoubtedly been a great success. He was constantly receiving letters from men here and from the Dominion speaking of the good the gathering did.

Other Cities.

Chapman cables now that the meeting met. He thought the millionaire business men who were gathered at the meeting would be doing more good than many who were discussing their funds in various fields of enterprise.

Mr. Brittain was unanswerable on this point. The big men had met and a lot of business had been made in the west, but admitted that they were very considerate, and he was mighty glad to learn that he had done something for him.

ATROCIOUS CRIME BY BLACKHAND SOCIETY

Policeman Reconciled With His Wife and Six Children Are Murdered in Biggest—Heads Crucified in With an Axe.

Riggle Di Calabria, Sept. 6.—To the vengeance of the Black Hand society is sacrificed the revolting maniacs today. They have taken the life of his wife and six children in the little village of Pollaro, which lies 8 miles south of Messina. At 2 o'clock this morning some of the townsmen of Pollaro were awoken by the sound of a call to arms running in the cottage occupied by the Revolynine. They found the three-year-old boy, the son of the victim, lying with her throat cut before the open door of her home screaming. Picking up the child, the village people saw that where he had found the remaining members of his family lying dead terribly maimed by the hand of death.

The Revolynines suddenly returned from the United States a short time ago and their old ways of assassination were meant to poison them.

Revolynine himself spoke of the possibility of vengeance being directed against him.

The crime was revolting in its bareness. Beside the bodies lay the bodies of the six children, all of whom were crushed in. Despite the efforts of surgeons to save the life of the little girl, she died. None of the townsmen saw or heard the Revolynines who escaped with the other members of the gang, leaving a clue as to their identity.

BOARD OF TRADE MEETING.

A question of transportation occupied the meeting of the Board of Trade in the room of the Canadian Club, the regular meeting place. President McGregor occupied the chair. The attendance was moderately good. This was followed by a motion of the board, in common with similar motions of other boards throughout the country, asking the Railway Commissioners of Canada to increase the minimum weights of carloads of grain shipped by rail under advisement by the Railway Commission. The object of the wholesalers is to make it easier for them at least increasingly difficult for grain manufacturers to ship direct to consumers in the West. The committee on whom was placed the responsibility of presenting the motion to the commissioners, which was done, then this increasing on what they consider the legitimate business of the transportation companies.

Very decided opposition was taken by certain members of the board of Trade to the action of the wholesalers. It was voted that the motion be referred to the committee on transportation.

REVIEW OF THE DOCTRINE OF NEW NATIONALISM.

EX-PRESIDENT ROOSEVELT DECLARATIONS FOR FEDERAL CONTROL OF NATURAL RESOURCES.

PRESIDENT HIMSELF IN DIRECT OPPosition TO ADVOCATES OF STATE RIGHTS.

ST. PAUL, MINN., Sept. 6.—The doctrine of "the New Nationalism," which ex-President Roosevelt enunciated in his speech at Oklahoma last week, was set forth still more clearly in his speech today before the National Conservation Conference.

He declared that the federal government must have control over all natural resources and in so doing placed the conservation of natural resources above state rights, which opposition to the principles which he laid down has divided the liveliest debate of the Conservation Conference.

Corporations to Blame.

If it had not been for the corporations, which may be described as predators, we would never have heard of this question of conservation, he declared.

And later he said: "It is not really a question of the state against the nation. It is really a question of the people against the great wealth work from the people."

He said the conservatives were anxious to have the states take up the work that they might escape all effective control.

The Other Side of It.

He said elsewhere: "But I do not want the National government to do everything, nor do I want the corporations to get justice for the people."

President Roosevelt advised the drainage of swamp lands in certain areas chiefly through the activity of the Federal government.

Outline His Ideas.

St. Paul, Minn., Sept. 6.—Theodore Roosevelt's speech on "Conservation," delivered at the meeting of the National Conservation Congress, outlined his ideas as to conservation and said that the whole country should be reclaimed entirely within one state. It might be well for the time, for the state to do the same.

Swamps which cover parts of more than one state, he said, should be improved by the general government, then distributed among the states if the swamp land could be transferred back to the general government that they might do the same work.

"All friends of conservation," he said, "should be in hearty agreement with the policy of the President laid down in connection with the coal oil and phosphate lands. I am sorry to say that at the last session Congress finally completed the work of clearing the surface title to the land beneath it."
